

RGIS Offers Expert Services for the Healthcare Industry

Local coverage, professional service with flexibility to meet your needs.

RGIS has a reputation as the world's premier inventory service provider. This knowledge and experience is based on 50 years of data collection extending to all aspects in Drug Store, Pharmacy, Acute Care and Hospital environments.

We understand the unique nature of your business and we have created successful and effective solutions to address your needs. Our unsurpassed level of coverage enables RGIS to professionally manage inventory cycles for healthcare professionals such as yourself.

The trained highly-skilled inventory teams provided by RGIS ensure your individual inventory requirements will always be a priority. To learn more about how RGIS can provide a cost-effective and headache-free inventory solution, please call us today at **1.800.551.9130**.

RGIS[®]

accurate • reliable • efficient • worldwide

RGIS Can Assist In Keeping Your Staff Doing What They Do Best – Serving Your Customers

For 50 years, our commitment to data integrity has made RGIS the most respected name in the industry.

Innovation

In today's competitive times, more and more Pharmacists are receiving results from NDC level inventories. This allows for immediate NDC-level results at the completion of the inventory. A full comparison of previous inventory values is also available at your fingertips. By taking advantage of this service, on-site validation of NDC and SKU numbers assures accurate pricing is captured, along with an ability to verify case pack quantities at point of entry.

RGIS is experienced in counting pharmaceuticals in both retail and hospital/acute care environments. This experience lends itself to "tablet-based" or "unit-dose" counts as well as experience with UBC's such as Pyxis and Accudose machines containing drug dosage ready for patient consumption.

Our expert staff, state-of-the-art technology and strategic partnerships allow us to offer the best possible inventory services at substantial savings over any other inventory service.

Results

We offer tailored solutions to assist in meeting your financial goals. With an RGIS independent audit of your inventory, true shrink results will be swiftly identified. Improved product availability and increased stock control will be realized. Expired product may be instantaneously identified, to promote a prompt return to the manufacturer. Our reach and reliability allow the flexibility to schedule inventories on your terms.

Impartiality

RGIS always uses its own trained staff as opposed to hiring temporary employees. This third-party approach helps ensure impartiality, and increases the accuracy of the inventory.

RGIS has no stake in the results; we desire – and deliver – accuracy.

RGIS Delivers
